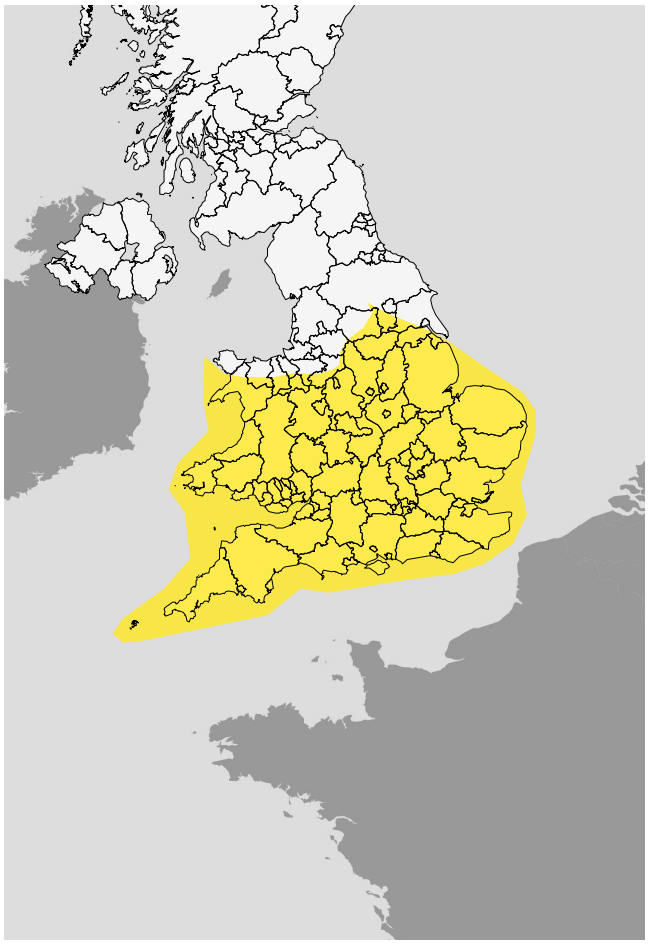
Yellow warning
Wind

Between
12:00 Sun 20 Feb 2022 and
15:00 Mon 21 Feb 2022



Further periods of strong winds are expected across much of England and Wales on Sunday and Monday which may cause some disruption.

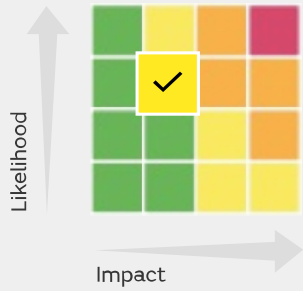
What to expect

- Some delays to road, rail, and ferry transport are likely.
- Delays or restrictions for high-sided vehicles on exposed routes and bridges likely.
- It's likely that some coastal routes, sea fronts and coastal communities will be affected by spray and/or large waves.
- Some damage to infrastructure and trees/branches is possible, especially where made more vulnerable by Storm Eunice.
- Power outages are possible, and efforts to restore power to areas which have had interrupted supply in the wake of Storm Eunice are likely to be hampered.

Further details

Winds are likely to strengthen across England and Wales ahead of a band of rain, which itself will turn increasingly squally, as it moves southeast on Sunday afternoon. Gusts of 55-60 mph are expected widely around south and west facing coasts, some of which may be more vulnerable than usual in the aftermath of Storm Eunice. Some places inland may see similar strength gusts, and on the squally rain band itself, gusts potentially as high as 70 mph.

Blustery showers will follow with further gusts of 60-70 mph mainly confined to coastal areas in the west during Sunday evening.



Medium likelihood of low impacts

Yellow warning
Wind

Between
12:00 Sun 20 Feb 2022 and
15:00 Mon 21 Feb 2022

Further Details (continued)

Whilst a temporary reduction in wind speeds is likely for a time overnight into Monday, winds will again strengthen from the northwest during the morning. Gusts of 50-60 mph are probable inland, especially Wales and western/central England.
